# Template Week 7 – Host your website on GitHub

Student number: 568209

Domain name (URL) of your website on GitHub:

https://eilyadabaei.github.io/

Relevant screenshots + motivation:

I created a website using HTML and CSS, and hosted it on GitHub. This assignment helped me get hands-on experience with making a website and keeping it online for review. I zipped all the files and

made sure everything is organized so it's easy to check. After the review, I'll take the site offline and keep my GitHub profile clean.   (use chtcpt for fix the grammer issues)
